"the times they are a changing".

Latest Press | Frisco Texas

Groundbreaking approach to VoIP switching between service providers, whether regulated or unregulated, eliminates cumbersome PSTN integration.

A CLEAR choice for your VoIP Termination

EASY and SIMPLE

Global IP Tandem is the "centralized" switching solution for the industries VoIP Providers. Global IP Tandem's "patent pending" SLRE or Self Learning Routing Engine to deliver high quality Point-to-Point connections between our member company networks. The topology of Global IP Tandem operates independent of the PSTN thus eliminating the complicated structure of tariffs and the costly collocation and integration expense. By joining our network of Member companies, we eliminate several points of failure by avoiding connecting to multiple carriers to deliver your calling traffic, this in turn will improve your quality of service and provide a flat, low cost termination rate. Our customers include both regulated and unregulated companies. Companies that originate VoIP or convert TDM call traffic to SIP within their network can avail themselves of the many advantages offered by Global IP Tandem. This includes VoIP providers, Wholesalers, Cable Providers, ILECs, CLECs, and other ISP / ESP companies. Integration with Global IP Tandem is simple and straight forward. With the assignment of an IP address via a SIP IP tunnel you are connected and ready to enjoy the many benefits available to our participating member companies.
